EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone call with Attorney William Egan on February 24, 2011.

Claim 29 of the application has been amended as follows:

29. (Currently amended) An accounting system, comprising:

a receiver configured to collect from a single game unit first meter information from a first unique combination of a game, a program and a denomination in ~~[[a]]the~~ single game unit and second meter information from a second unique combination of a game, a program and a denomination in the single game unit, wherein a program represents a pay schedule that includes game outcome probabilities that define a particular version of a model that yields a specified payback, and wherein each of the game, the program, and the denomination is separately selectable;

a database configured to store the collected information;

a calculator structured to generate additional information from the collected information for the unique combinations in the single game unit, including at least:

a first comparison of financial performance of different wager

denominations for a given game at the game unit, the first comparison displayed

in a first table that includes information about each of the different wager denominations for the given game at the game unit, and

a second comparison of financial performance of different games within a given game type at the game unit, the second comparison displayed in a second table that includes financial performance information about each of the different games within the given game type at the game unit; and

wherein the first meter information and the second meter information are collected at established intervals.

The fourth paragraph of p. 2 of the Applicant's specification-as-originally-filed has been amended as follows:

FIGs [[19-23]]19A, 19B, 20A, 20B, 21A, 21B, 22A, 22B, 23A, and 23B are example reports that can be produced by embodiments of the invention.

Drawings

The drawings are objected to because there appears to be a typographical error in the replacement drawings filed on March 4, 2004; specifically, the fifth page of this set of drawings should be labeled --5/25-- instead of "5/35." Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the

appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). The objection to the drawings will not be held in abeyance.
